Prize Wheels

Our frames are constructed of solid oak materials. High quality workmanship is our priority and promise.

Made of high quality lumber and stainless steel bearings and pegs, these prize wheels are designed to last a life time.

At last count we stock nearly 100 different combinations of sizes, colors and designs. Our design department can help you create a custom prize wheel using your colors and company logo.

Our state of the art digital printing process produces a product that compares with or exceeds the quality of any prize wheel on the market today. This allows us to work with an unlimited amount of colors and design options. After printing, the surface of the wheel is laminated with a unique dry erase film which not only provides a durable high gloss finish, but also creates a writing surface for any dry erase marker.

We are convinced that the products we sell will be of lasting value to your organization.
